

### **3 and 5 Day Aerial Platform Sniper course**

The 3 and 5 day Aerial Sniper Course develops advanced skills for the Designated Marksman that has already been trained in basic Sharpshooter operations. This course begins with basic aircraft familiarization procedures and takes the student to a point where they are engaging targets from a moving aircraft up to 20knts. The only difference in the 5-day course is the amount of flight time given to students. The a/c used for this course are smaller more agile helicopters that are more likely used in civilian agencies around the country from Bell Jet Rangers to MD-500.
