

PRE-INCIDENT FACILITY SURVEY FOR LAW ENFORCEMENT

When a threat situation happens, local Law Enforcement will need a place to conduct business and information that you may not have or time to collect and pass on. Our Facility Survey Products are prepared with threats in mind and how Law Enforcement utilizes it. These surveys are given to your local Law Enforcement Department and from there an integration plan can be completed. This allows the most efficient use of time, money and effort for your Emergency Action Plan (EAP) integration and risk assessment and mitigation.
